Candidate C

Data Analyst and Automation Specialist

candidate-c@example.invalid | Toronto, ON | Fictional sample profile

PROFESSIONAL SUMMARY

Analyst who uses Python and SQL to reduce repetitive reporting and improve data quality. Experienced in operational analysis, documentation, and partnering with business teams.

CORE SKILLS

Python scripting, SQL, PostgreSQL, pandas, data quality checks, reporting, documentation, basic Flask

EXPERIENCE

Data Analyst | Meridian Supply Group | 2021-2026

- Maintained SQL queries and PostgreSQL views used by 30 recurring operations reports.
- Wrote Python scripts to validate weekly CSV extracts, reducing a manual audit from eight hours to three.
- Documented data definitions and investigated discrepancies with finance and operations colleagues.
- Prepared dashboard datasets and explained trends to non-technical stakeholders.

Operations Reporting Specialist | Elmway Distribution | 2018-2021

- Created reusable SQL reports for order exceptions, inventory aging, and service-level tracking.
- Built a small Flask prototype used by four analysts for two months; it was not deployed as a production service.
- Performed manual data imports and checks; did not own API operations, incident response, or background processing.
